August 27, 2019

Dear Mr. / Mrs.:

This letter is to express my interest in your posting on facebook.com for a Software Developer.

With a Bachelor's degree in Electronics Engineering, I began coding more than ten years ago, first involving micro-controllers and electronics software, then as a hobby and finally, I decided to make it my primary profession two years ago. Since then I'm focused on improving my skills and finding interesting projects and people to work with.

Personally, I enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me as aiming the project's goals. Due to all this, I am confident I will be an asset to you.

From the tech stack mentioned, I find working with PHP the most motivating and challenging. It was the first language I started learning Web Development with, but I didn't have the chance to use it in my current projects so I find this a good opportunity to get back to it.

Some of the personal projects I have implemented are the following:

- [Crypto Currency Simulator](#) (Ruby on Rails, hosted in Heroku)
- [Purchases Sales System](#) (PHP, hosted in Heroku)
- [Crypto Currency prices Search Bar](#) (ReactJS, hosted in AWS)

I've attached a copy of my CV that details my experience and education in software development and I can be reached anytime via email at fedejimenez@gmail.com

Thank you for your time and consideration. I look forward to speaking with you about this opportunity.

Sincerely,

Federico Esteban Jiménez
